CSS   Heroku
JavaScript   GoDaddy
Python   123-Reg
Bootstrap

DATA   **FRAMEWORKS**

PostgreSQL   PrestaShop
MongoDB   Flask
                  Django

Stripe   AWS

FRAMEWORK EXPOSURE

React

👤 PROFILE

I am a qualified Full Stack Software Developer experienced in HTML, CSS, JavaScript, Python and Django. Highly driven and motivated, I readily adapt to different situations and thrive on delivery, success and attention to detail. An excellent team player, who is also self-motivated and self-reliant, that strives to improve and develop designs and systems.

💼 WORK EXPERIENCE

DECATHLON SWEDEN: 2022 Mar – 2022 Sep

STOCKHOLM

Web Designer

- Overall responsibility for User Interface and User Experience. Keeping up to date with current Decathlon trends
- Along with a fantastic team a new design and layout for the Home page and Sports pages were launched in accordance with Decathlon's graphic profile
- For greater user experience I implemented intuitive features using JavaScript
- With the launch of PrestaShop I took the lead in optimising the website and decreasing page load time, with Decathlon Sweden having the most optimised Home page out of all Decathlon entities using PrestaShop
- On a seasonal basis new Home page banners were designed that were tailored and continually improved to help increase sales
- I supported and trained colleagues with HTML, CSS and Photoshop to help allow for a more dynamic and empowered team.

FREELANCE: Web Designer/ Web Developer

STOCKHOLM/ UK

As a freelancer I build websites from the initial agile framework discussions to deployment. I work closely with clients creating a strong rapport and loyalty. I continue to improve User Interface and User Experience and adhere to programming standards and clean code.

Ignite Theatre : 2022 Oct - 2022 Nov

- As Ignite Theatre grew, I took the lead in launching a more dynamic, professional website using Django along with Python to cater for the higher demand
- Django along with Python, allowed for Create, Read, Update and Delete functionality, which empowered the client to update all content throughout the website
- All static and media files were stored and configured using Amazon Web Services (S3)
- Using the cloud application program, Heroku, I successfully allowed the client to point their new domain to GoDaddy
- Code: HTML | CSS | JavaScript | Python | Django | Bootstrap | Postgres | AWS S3 | Heroku

FREELANCE: Web Designer/ Web Developer
STOCKHOLM/ UK

Frank Hurst (Author) : 2021 Mar - 2021 May

- With the upcoming release of his forth book, I regenerated and expanded the website to allow for more content and photography using the Flask framework
- Wireframes were discussed and a bespoke website was tailored to the clients requirements
- A professional, stylish website for Frank Hurst was deployed, which caters for 'Latest News' stories, provides an expansive gallery and a great platform to showcase his books
- Using the cloud application program, Heroku, I successfully allowed the client to point their new domain to 123 Reg
- Code: HTML | CSS | JavaScript | Python | Flask | Bootstrap | Heroku | 123Reg

Lisa Fairfield (Actress) : 2020 Mar - 2020 Jun

- This website was designed and launched to attract potential casting agents for the client who are looking for actresses in advertising, theatre and film
- The client desired a website to seek out agents or key contacts, and through meetings and discussions, a fresh, stylistic website to showcase the actress, Lisa Fairfield was deployed.
- Using the cloud application program, Heroku, I successfully allowed the client to point their new domain to GoDaddy
- Code: HTML | CSS | JavaScript | Python | Flask | Bootstrap | Heroku | GoDaddy

CODE INSTITUTE: 2021 Mar
Hackathon (Theme: St. Patrick's Day)
STOCKHOLM

Team Leader

- As an alumni I took the lead in a team of beginners for an exciting weekend Hackathon
- To ensure we kept to deadlines a timetable of work was planned along with facetime calls to allow for cohesiveness and good rapport
- Team work was vital and I encouraged input and support throughout the team
- I also ensured all pull requests were evaluated and assessed to maintain integrity of the website upon each commit

INTERESTS

I enjoy writing and designing and I have quite recently researched and published a book, titled "A Brief Interlude" by Jack Fairfield.

I am an keen runner and gym enthusiast who enjoys the challenge of Obstacle Course Racing.

I am a manager and player for Långholmen Football Club playing 7 aside throughout the year.

I enjoy walking and trekking and have enjoyed many fantastic climbs through out the world.
